

# FY 11-12 Water Transmission Budget

## Overview

The proposed budget for FY 2011–2012 will be based on accomplishing a focused set of goals, including the required elements of the Biological Opinion, continued implementation of hazard mitigation and reliability projects, and normal maintenance of facilities. Whenever possible, alternative sources of revenue, such as FEMA grants, will be used to finance capital projects. In the past year the Water Agency received funding of \$ 6.2 million from FEMA for projects including the Rogers Creek Fault crossing, up to 27 isolation valves, and the Russian River Crossing. Likewise, costs of the Biological Opinion continue to be carefully assigned across multiple funding sources and only those attributable to the Water Transmission System are included. Page numbers referenced refer to the Water Advisory Committee budget package.

## Deliveries (Pages A-6 & A-7)

As required by the Restructured Agreement for Water Supply, the budget year forecast deliveries are based on the past 12 months actual deliveries or the 12 month average over the past 36 months, whichever is smaller. The 12 month actual deliveries through December 2010 were 47,848 acre feet and the annual average over the last 36 months was 52,385 acre feet. Therefore, 47,848 acre feet are used to calculate rates. This is a 4.02% drop in deliveries from the 49,853 acre feet used for the FY 2010-2011 budget and rates. The drop in water delivered continues to be a major factor resulting in increased rates. (Restructured Agreement Section 4.1)

## Rates (Pages A-1 & A-5)

There are no Capital Charges in the budget for any aqueduct. The resulting rates are shown below:

Charge / Aqueduct	Santa Rosa	Petaluma	Sonoma
O&M	\$439.04	\$439.04	\$439.04
Water Mgt Planning	4.18	4.18	4.18

## ▪ **Water Transmission System Fund**

### ▪ **Revenues (Page A-8)**

The revenues of the Water Transmission System Agency Fund are budgeted to increase by .40% or \$129,622 to \$32,660,794. These total revenues are comprised of numerous revenue categories, the biggest of which are water sales used to support operations and maintenance (O&M) activities. Interest income and power sales income are also budgeted to decrease due to low interest and power rates.

Revenue for the Watershed Planning and Restoration Charge, which is used for Biological Opinion projects in the main Russian River per the Restructured Agreement, is no longer capped at \$35 per acre foot and is increasing to \$2,610,680. (Restructured Agreement Section 4.14)

### ▪ **Expenses**

Expenses associated with ongoing operations and maintenance of the water transmission system are budgeted to decrease by \$737,162 (\$25,999,456 total O&M). Funding for capital projects, Water Management Planning, Watershed Planning and Restoration, Recycled Water and Local Supply and Water Conservation are budgeted to increase by \$2,012,957 (\$12,722,113 total capital project and sub fund costs). Overall expenses are budgeted to increase by \$1,305,795 or 3.47% to \$38,891,569. Each of the expense areas contributing to this increase is discussed below:

#### ○ **Operations and Maintenance (Page A-9):**

O&M expenses are budgeted to **decrease** primarily because of reduced labor (\$400,000) and power (\$350,000) costs. These costs have decreased because of staffing reductions and expected lower power rates and decreased consumption.

#### ○ **Water Management Planning (Page A-32):**

Water Management Planning fund is primarily used for the Urban Water Management Plan (UWMP) related activities. The 2010 UWMP should be substantially completed in FY2010-2011 and thus will require lower funding levels in FY2011-2012. The total budgeted expenses for this fund will decrease from \$950,000 in the current fiscal year to \$200,000 for FY 2011-2012. (Restructured Agreement Section 4.13)

#### ○ **Watershed Planning and Restoration (Page A-33):**

This fund pays for Biological Opinion expenses related to the flows in the Russian River and the estuary. Per the Restructured Agreement the rate has been capped at \$35 per acre foot until FY 2011-2012. The fund has experienced expenses in excess of revenues up until now and is expected to end FY2010-2011 with a negative fund balance of - \$1,546,759. The charge for this fund is thus being increased to cover both the expected expenses and to restore a positive fund balance by the end of FY 2011-2012. Total budgeted expenses in the fund will increase from \$1,777,650 to \$2,610,680 because of increased staff time on required Biological Opinion projects (Decision 1610 and estuary management). The budget also reflects reduced use of consulting services. (Restructured Agreement Section 4.14)

- **Recycled Water and Local Supply (Page A-34)**

Recycled Water and Local Supply remains essentially unchanged from the prior year. No new LRT2 projects are proposed by the Water Contractors. Work continues on the Sonoma Valley and Santa Rosa Plain ground water studies. Water Agency staff is expected to spend \$100,000 less offset by an increase in consulting services of \$95,000 as these ground water studies continue. (Restructured Agreement Section 4.15)

- **Water Conservation (Page A-35 and A-39)**

Water Conservation pays for the Agency's regional activities related to water education and conservation. Revenues are declining because of \$74,000 decrease in a State Grant. Water conservation expenses are essentially unchanged from the previous fiscal year. (Restructured Agreement Section 4.16)

## **Capital Projects**

- **Pipeline (Page A-18)**

- **Santa Rosa Aqueduct - LHMP - Program Design \$25,000**

Requested funds will be used to: 1) update the Local Hazard Mitigation Plan (LHMP), which is the key document required by FEMA to qualify for disaster mitigation funding; and 2) identify and develop project implementation strategies (alternatives) for individual mitigation projects listed in the current LHMP. This preliminary work will clarify the project scopes and alternatives for FEMA grant applications that the Water Agency is submitting annually. Similar budget requests will be required in the future as long as natural hazard mitigation projects continue to be implemented and grant funds sought.

- **Petaluma Aqueduct - LHMP - Program Design \$25,000**

Requested funds will be used to: 1) update the Local Hazard Mitigation Plan (LHMP), which is the key document required by FEMA to qualify for disaster mitigation funding; and 2) identify and develop project implementation strategies (alternatives) for individual mitigation projects listed in the current LHMP. This preliminary work will clarify the project scopes and alternatives for FEMA grant applications that the Water Agency is submitting annually. Similar budget requests will be required in the future as long as natural hazard mitigation projects continue to be implemented and grant funds sought.

- **Petaluma Aqueduct – Cathodic Protection \$886,000**

The Petaluma Aqueduct consist of 86,000 feet of 24-inch and 33-inch diameter cement mortar lined and coated steel pipe that was installed around 1962. It

extends from downtown Santa Rosa along the Northwestern Pacific Railroad tracks to Petaluma. The pipe does not meet corrosion protection levels set by National Association of Corrosion Engineers (NACE) Standards. In order to continue to protect the pipe from corroding, the Agency is planning to install an impressed cathodic protection system. It will be designed to protect the pipe for 20 years. This project should be completed before July 2012.

- **Sonoma Aqueduct - LHMP - Program Design \$25,000**

Requested funds will be used to: 1) update the Local Hazard Mitigation Plan (LHMP), which is the key document required by FEMA to qualify for disaster mitigation funding; and 2) identify and develop project implementation strategies (alternatives) for individual mitigation projects listed in the current LHMP. This preliminary work will clarify the project scopes and alternatives for FEMA grant applications that the Water Agency is submitting annually. Similar budget requests will be required in the future as long as natural hazard mitigation projects continue to be implemented and grant funds sought.

- **Pipeline Condition Assessments \$200,000**

Evaluate condition of transmission system pipelines using in-the-pipe technologies that may include closed-circuit TV inspection, acoustic, sonar, and laser profiling. Evaluation shall identify condition of mortar lining (e.g. remaining thickness) and presence of cracks or leaks. Assessments will be performed on the Sonoma and Santa Rosa Aqueducts and are budgeted at \$100,000 each.

- **Storage (Page A-15)**

- **Preliminary Alignment Eng Study (Reliability and Enhancement) \$75,000**

Conduct preliminary engineering and alignment study for a new reliability pipeline connecting the Kawana Tanks to the Ralphine Tanks and Sonoma Booster Pump Station. Ultimate project will enhance the reliability of water supply to east Santa Rosa and Sonoma Valley, particularly in regards to the current vulnerability of the existing pipeline under Spring Lake. Requested funds for FY 11-12 will enhance the previously budgeted funds in order to evaluate the future pipeline segment along the Farmer's Lane extension and the crossing of the Rodgers Creek Fault. Pending the findings of the preliminary engineering alignment study, subsequent budget requests will be submitted for environmental compliance, design, and construction. Overall project cost preliminarily estimated at \$31 million.

- **Kastania Check Valve Replacement \$75,000**

The existing check valve at this site is buried. This project work would provide access in the event of a failure and when maintenance is needed. The agency is

proposing to complete this project now because Cal-Trans is relocating a section of the pipeline in this area which will result in cost savings on this check valve replacement work.

- **Common (Pages A-20 thru A-22)**

- **Isolation Valves \$150,000**

Requested funds will support environmental compliance efforts and preliminary design to facilitate the processing of the FEMA funding award (\$1.93 million) for this natural hazard mitigation project. The project will install isolation valves at various locations throughout the transmission system to improve response and system restoration due to damage from a major seismic event. Funds are needed to accommodate FEMA's schedule for preparing the environmental compliance documents and final grant award. Subsequent budget requests will be submitted in future fiscal years for design and construction. Total project cost is estimated at approximately \$2.6 million.

- **Forestville Storage Tank \$722,000**

Requested funds will provide for the construction of a new 300,000 gallon storage tank to satisfy the transitional provisions applicable to Forestville outlined in the Restructured Agreement for Water Supply (Section 1.14) and to meet Forestville's schedule for constructing the tank.

- **Air Valves \$370,000**

Requested funds will be provided for the continued replacement and upgrade of air/vacuum valves throughout the transmission system to comply with current regulatory requirements. Following Fiscal Year 10/11, approximately half of the air/vacuum valves will remain to be replaced and are programmed for replacement between FY 11-12 through FY 13-14 at an estimated cost of \$1.74 million.

- **Decommission Wohler Ponds \$200,000**

The Biological Opinion for Water Supply, Flood Control Operations, and Channel Maintenance issued on September 24, 2008 includes Reasonable and Prudent Measure 6 (RPM) which requires that measures be undertaken to ensure that harm and mortality to listed salmonids from diversion operations, maintenance and fish screen replacement at Wohler and Mirabel are low. Item C under the RPM requires SCWA to decommission or modify the infiltration ponds at Wohler to prevent fish entrapment in the ponds during flood events. The project must be completed by September 24, 2011.

SCWA's approved plan for pond decommission is to remove all valves and grade the ponds and channels so that they will fill and drain without hindrance when the river

risers during flood events. All work must be completed during the summer of 2011 in order to meet the requirements of the BO.

- **RDS Liquefaction Mitigation \$150,000**

Requested funds will provide for conducting field investigation and study to identify preferred alternatives to mitigate liquefaction conditions at the RDS pumping facility and develop proposed project for future FEMA funding application. Grant application is anticipated to be submitted October 2012. Subsequent budget requests will be submitted in future fiscal years for grant support, environmental compliance, design, and construction. Total project cost is preliminarily estimated at approximately \$5 million, though project alternatives are not well defined at this time.

- **Collector 6 Liquefaction Mitigation \$125,000**

Requested funds will provide for conducting field investigation and study to identify preferred alternatives to mitigate liquefaction conditions at Collector 6 and develop proposed project for future FEMA funding application. Grant application is anticipated to be submitted October 2012. Subsequent budget requests will be submitted in future fiscal years for grant support, environmental compliance, design, and construction. Total project cost is preliminarily estimated at approximately \$1.5 million, though project alternatives are not well defined at this time.

- **Russian River Crossing \$100,000**

Requested funds will support environmental compliance efforts and preliminary design (esp. geotechnical investigation) to facilitate the processing of the FEMA funding award (\$2.95 million) for this natural hazard mitigation project. The project will construct a new or modified transmission system crossing at the Russian River to mitigate the risks of pipeline rupture due to liquefaction from a major seismic event. Funds are needed to accommodate FEMA's schedule for preparing the environmental compliance documents and final grant award. Subsequent budget requests will be submitted in future fiscal years for environmental compliance, design, and construction. Total project cost is estimated at approximately \$3.9 million.

- **Mark West Creek Crossing \$10,000**

Requested funds will provide for further project development and grant support efforts for pursuit of FEMA disaster mitigation funding. FEMA grant application was submitted October 2010. The project will construct a new or modified transmission system crossing at Mark West Creek to mitigate the risks of pipeline rupture due to

liquefaction from a major seismic event. Pending a favorable review for a potential \$2.81 million FEMA award, subsequent budget requests will be submitted in future fiscal years for environmental compliance, design, and construction. Total project cost is estimated at approximately \$3.75 million.

- **Mirabel Dam Emergency Response Plan \$175,000**

Requested funds will provide for the preparation of an emergency response plan and pre-design/strategy for longer-term repair or replacement of the Mirabel Dam in the event of a failure. The plan is being provided in response to water contractor request

- **Collector 3 & 5 Liquefaction Mitigation Pre-Design \$50,000**

Currently budgeted funds will provide for field investigation and study to identify preferred alternatives to mitigate liquefaction conditions at Collectors 3 & 5 and identify proposed project for FEMA funding application. FY 11-12 requested funds will provide for continued support for project development, environmental compliance, and FEMA grant application. Grant application is anticipated to be submitted October 2011. Subsequent budget requests will be submitted in future fiscal years for environmental compliance, design, and construction. Total project cost is preliminarily estimated at approximately \$3 million, though project alternatives are not well defined at this time.

- **Mirabel Potable Water Line \$150,000**

This is a line from Caisson 3 to the Mirabel storage area. This would supply water to the storage shed and supply water for a new fire hydrant. The existing hydrant is smaller than adequate for that site and causing problems with the chlorination of the water being pumped from the Mirabel site. Installing a line directly from the caisson eliminates that issue.

- **Automated Meter Infrastructure \$200,000**

This would install the infrastructure necessary to read all of our billing meters as well as providing continuous usage and flow data which will be instrumental in leak detection and resource management. This amount should be adequate to fund the remainder of the project.
